Approaches to enactment of UN Security Council Resolution 1540 related legislation

Dr Sonia Drobysz
Legal Officer, National Implementation Measures Programme, VERTIC

23-24 March 2015. Lima, Peru
Outline

- What should UNSCR 1540-related legislation cover?
- What areas of national law are affected?
- Approaches to 1540-related legislation
- Which approach is the best for your country?
- Useful tools
What should UNSCR 1540-related legislation cover?

- 2. Decides also that all States, in accordance with their national procedures, shall adopt and enforce appropriate effective laws which prohibit any non-State actor to manufacture, acquire, possess, develop, transport, transfer or use nuclear, chemical or biological weapons and their means of delivery, in particular for terrorist purposes, as well as attempts to engage in any of the foregoing activities, participate in them as an accomplice, assist or finance them;

- 3. Decides also that all States shall take and enforce effective measures to establish domestic controls to prevent the proliferation of nuclear, chemical, or biological weapons and their means of delivery, including by establishing appropriate controls over related materials and to this end shall: […] (d) Establish, develop, review and maintain appropriate effective national export and trans-shipment controls over such items, including appropriate laws and regulations to control export, transit, trans-shipment and re-export and controls on providing funds and services related to such export and trans-shipment such as financing, and transporting that would contribute to proliferation, as well as establishing end-user controls; and establishing and enforcing appropriate criminal or civil penalties for violations of such export control laws and regulations;

- 5. Decides that none of the obligations set forth in this resolution shall be interpreted so as to conflict with or alter the rights and obligations of State Parties to the NPT, the CWC and the BTWC or alter the responsibilities of the IAEA or the OPCW;
What should UNSCR 1540-related legislation cover?

- Definitions

- Prohibitions, penalties and alternative criminal liability

- Jurisdiction

- Domestic controls: accounting for, securing and physically protect

- Transfer controls

- Domestic controls: enforcement
What areas of national law are affected?

- Criminal law;

- Export-import, strategic and dangerous goods, customs laws;

- Regulatory systems for dual-use materials, including measures to account for and physical protect relevant materials;

- Banking laws, financing of terrorism;

- Related enforcement measures: criminal procedure laws, etc.
Approaches to 1540-related legislation

1) Standalone C, B, RN laws

- Mainly common law countries have adopted this approach (with a few exceptions)

- Two trends identified:
  - Law that only contains the necessary penal provisions
  - Comprehensive law containing penal provisions, safety/security measures, export control provisions and enforcement measures

- Pros and cons of this approach?
Example: standalone BWC law with only penal provisions

LAWS OF ANTIGUA AND BARBUDA

Biological Weapons  (CAP. 52)

CHAPTER 52

THE BIOLOGICAL WEAPONS ACT

Arrangement of Sections
Section
1. Short title.
2. Interpretation.
3. Restriction on development, etc., of certain biological agents, toxins and weapons.
4. No prosecution without consent of the Director of Public Prosecutions.
5. Offences by bodies corporate.
6. Arrest without warrant.
7. Power to search and obtain evidence.
Example: standalone BWC comprehensive law
2) A ‘Weapons of Mass Destruction’ law

- Such laws may include the establishment of a ‘CBRN National Authority’

- Some countries have adopted legislation to implement the CWC and BWC in one law and/or have one common authority

- Pros and cons of this approach?
The Weapons of Mass Destruction and Their Delivery Systems
(Proliferation of Unlawful Activities) Act, 2005

No. 21 of 2005

[6th June, 2005.]

An Act to prohibit unlawful activities, in relation to weapons of mass destruction and their delivery systems and for matters connected therewith or incidental thereto.
Example: South Africa WMD law

Act No. 87, 1993

GOVERNMENT GAZETTE, 2 JULY 1993
NON-PROLIFERATION OF WEAPONS OF MASS DESTRUCTION ACT, 1993

ACT

To provide for control over weapons of mass destruction; and the establishment of a Council to control and manage matters relating to the proliferation of such weapons in the Republic; to determine its objects and functions; to prescribe the manner in which it is to be managed and controlled; and to provide for matters connected therewith.
3) Implementation through several laws and regulations

Most European countries (and civil law countries) have adopted this approach

- How does the implementation work?
  - Criminal provisions: Penal Code or counter-terrorism legislation
  - CBRN material safety/security provisions: separate nuclear laws, bio laws, etc.
  - Export control of dual use items: in export control laws, customs codes or military/sensitive goods/dual-use items legislation
  - Enforcement: through criminal procedure codes, police laws, extradition laws, mutual assistance in criminal matters legislation

- Gaps can be filled with amending legislation:
For example, amending the penal code, adopting control lists (preferably through regulation), adopting a CBRN material safety/security law, and/or reinforcing the export control regime

- Pros and cons of this approach?
Is there any other approach you can think of?
Which approach is the best for your country?

- No one size fits all: each State will decide the type of implementing measures it requires and which approach to follow

- Possible to combine various approaches

- What factors should be taken into account when deciding on which approach to follow?
  - Constitutional processes
  - Assessment of international obligations related to UNSCR 1540
  - Assessment of the national and regulatory framework: measures already in place
  - Assessment of the scope of current and future NBC national activities
  - Assessment of the level of detail required in the legislation
  - Actors involved in the drafting process and implementation of the law
To compare various approaches to national implementation…
