"Official Gazette of RS, no. 101/2005

On the basis of Article 96 Item 2) of the Constitution of the Federal Republic of Yugoslavia,
bringing

The K A M

A DECLARATION OF
ON GENETICALLY modified organisms

Declares the Law on Genetically Modified Organisms, which was passed by the Federal
Assembly, the Citizens Council meeting of 8 May 2001. and at the meeting of the Council of
Republics of 8 May 2001. year.

PR no. 28 President
8th May 2001. The Federal Republic of Yugoslavia
Belgrade, Vojislav Kostunica, s. r.

Z A K O N

ON GENETICALLY modified organisms

I. GENERAL PROVISIONS

Article 1

This law regulates the conditions for limited use, the introduction in the production and
marketing of genetically modified organisms and products of genetically modified organisms, as
well as the conditions and measures for the prevention and elimination of side effects in limited
use, production and trade of genetically modified organisms and products genetically modified
organisms.

Article 2

Certain terms used herein shall have the following meanings:

- 1) the organism is any biological entity that can replicate and transmit their genetic basis of
offspring;
- 2) genetically modified organism is an organism other than human, whose genetic basis of
altered using recombinant DNA technology (genetic engineering);

3) the product is every product that is produced from genetically modified organisms or containing genetically modified organisms, or a combination of genetically modified organisms, which is put on the market;

4) limited the use of any operations which are genetically modify organisms or in which genetically modified organisms and products of genetically modified organisms produced, stored, used, transported, disposed or destroyed, and in which physical barriers or a combination of physical, along with chemical, or biological barriers, are used to prevent their contact with any form of life and environment;

5) the introduction of the production is the production of genetically modified organisms to ensure their reproduction for commercial purposes, where these organisms are brought into contact with the environment,

6) placing on the market the supply or making available of genetically modified organisms and products of genetically modified organisms to third parties;

7) assessment of risk is assessing the risks for human health and the environment (which includes plants and animals) from entering the genetically modified organisms or products of genetically modified organisms into the environment;

8) environment it is environment that corresponds to environments in which genetically modified organisms and products of genetically modified organisms can be recorded during the research, production or operations;

9) incident is any event with a limited use, production or trade of genetically modified organisms and products of genetically modified organisms in which there is uncontrolled release of genetically modified organisms and products of genetically modified organisms out of the planned facilities, which could pose an immediate or delayed danger to the human health or the environment;

10) the competent federal authority is a federal body which deals with the field of agriculture;

11) authorized the federal organization is a federal organization that performs control of limited use, production and trade of genetically modified organisms and products of genetically modified organisms;

12) the creator is a person or an individual entrepreneur who created the genetically modified organisms or products of genetically modified organisms;

13) by a legal entity or natural person entrepreneur using the genetically modified organisms and products of genetically modified organisms and responsible for their use;

14) authorized organization is a legal entity that performs testing and control of genetically modified organisms and products of genetically modified organisms.

Article 3

The creator, by the authorized organization engaged in limited use, production, trade and control of genetically modified organisms and products of genetically modified organisms are obliged to carry out these activities meet the requirements in terms of personnel, facilities, equipment and devices, as well as provide evaluation risk in limited use, production and trade of genetically modified organisms and products of genetically modified organisms.

Criteria for fulfilling the requirements for limited use, the introduction in the production and marketing of genetically modified organisms and products of genetically modified organisms, which must meet the creator, user and authorized organization, provides the competent federal authority.

The relevant federal organizations controlled by the requirements of Paragraph 1 this article and the decision determined whether those conditions are met.

II. PROCEDURE FOR APPROVAL OF RESTRICTED USE, INSTALLATION IN PRODUCTION OR MARKETING IN TRAFFIC GENETICALLY MODIFIED ORGANISMS AND PRODUCTS GENETICALLY MODIFIED ORGANISMS

Article 4

The procedure for issuing permits for limited use, the introduction of the production or marketing of genetically modified organisms and products of genetically modified organisms be launched on the basis of application creators, users, or their authorized representative in the Federal Republic of Yugoslavia to the genetically modified organisms and products of genetically modified organisms (hereinafter referred to as the applicant).

Log in paragraph 1 This article is submitted to the competent federal organization.

The competent federal body shall prescribe the application form.

Section 5

If the competent federal organization determines that the application does not comply with the provisions of Article 4 this law, the relevant federal organizations will, stating reasons, invite the applicant within 30 days of receipt of the notice, correct deficiencies found.

If the applicant fails to remove certain deficiencies, the application will be rejected by conclusion.

Article 6

The applicant may designate certain information in the report submitted as a secret if its disclosure to the public could jeopardize his position in relation to the competition.

If the applicant withdraws the application, the responsible federal organization is obliged to protect the confidentiality of information designated in paragraph 1 this article.

Article 7

At the request of the relevant federal organizations, the applicant shall submit the proper amount of material for testing genetically modified organisms and products of genetically modified organisms.

Testing of genetically modified organisms and products of genetically modified organisms is authorized organization to prescribed methods.

The relevant federal organizations authorized a contract with the organization for testing and control of genetically modified organisms and products of genetically modified organisms of.

Article 8

The authorized organization shall submit a report with findings and opinion of the competent federal organization upon completion of testing of genetically modified organisms and products of genetically modified organisms.

Article 9

The relevant federal organizations assess whether the conditions of the application and the report and authorized organization shall issue a decision approving:

- 1) limited the use of genetically modified organisms and products of genetically modified organisms;
- 2) introduction in the production of genetically modified organisms and products of genetically modified organisms;
- 3) marketing of genetically modified organisms and products of genetically modified organisms.

The relevant decision of the federal organization determines the duration of limited use, production and trade of genetically modified organisms and products made from genetically modified organisms.

Article 10

Each new genetically modified organism or product of genetically modified organisms that contain or consist of the same genetically modified organisms or a combination of genetically modified organisms, and which is intended for a different use from the use of which the decision is approved, must be re-submitted and approved.

Article 11

Genetically modified organisms and products of genetically modified organisms for which it is issued a solution to limited use, the introduction of the production or marketing responsible federal organization registered in the register of genetically modified organisms and products of genetically modified organisms (hereinafter tsksu: index).

The competent federal body shall prescribe the contents and information are kept in the Register.

Article 12

The relevant federal organizations published in the Official Gazette of the FRY "list of genetically modified organisms and products of genetically modified organisms for which it is issued a solution to limited use, the introduction of the production or marketing.

A legal person, entrepreneur or individual who has a legitimate interest may file a complaint to the relevant entry in the Register of the federal organization within 15 days after publication in the Official Gazette of the FRY. "

The complaint must be based on evidence that conditions are not established by this law and regulations based on this law.

Article 13

The relevant federal organization shall consider the complaint and within 30 days from the date of the appeal submit a response to the complaint.

If the complaint remains the complaint, he shall, within 30 days of receiving the answers provide additional information or material that is used for testing genetically modified organisms and products of genetically modified organisms in order to determine the allegations in the complaint.

If the complainant does not meet the requirements of paragraph 2 this Article, the complaint will be rejected by conclusion.

The relevant federal organizations may order further testing of genetically modified organisms or products of genetically modified organisms.

Based on the report of the authorized organization, the relevant federal organizations made a decision on the complaint that is final in administrative procedure.

Article 14

The applicant may begin limited use introduction to the production or marketing of genetically modified organisms and products of genetically modified organisms after receiving the decision

of the competent federal organizations.

Article 15

Creator or user who is issued a solution to limited use, the introduction of the production or marketing of genetically modified organisms and products of genetically modified organisms can not contract their rights to other legal or natural person.

III. TERMINATION OF THE RESTRICTED USE, INSTALLATION IN PRODUCTION OR MARKETING IN GENETIC OPERATIONS MODIFIED ORGANISMS AND PRODUCTS GENETICALLY MODIFIED ORGANISMS

Article 16

Terms of limited use, the introduction of the production or marketing of genetically modified organisms and products of genetically modified organisms, shall cease before the expiry specified in the decision-maker or the user if a written request from the competent federal organization making a decision on the termination of the date specified in the request.

Article 17

The relevant federal organization may cancel the decision on the limited use introduction to the production or marketing of genetically modified organisms and products of genetically modified organisms, if it finds the creator, user or authorized organization fails to comply with the prescribed conditions or in the event of an incident.

Article 18

If the decision on the limited use introduction to the production or marketing of genetically modified organisms or products of genetically modified organisms is abolished or expired determined in the solution to limited use, the introduction of the production or marketing of genetically modified organisms and products of genetically modified organisms, the relevant federal organizations will make their registration.

IV. SUPERVISION

Article 19

The competent federal authority is administrative supervision over the implementation of laws and regulations based on this law by federal inspectors.

Article 20

In performing inspection supervision over the implementation of this law, the federal inspector

is authorized to:

- 1) controls the limited use, the introduction in the production or circulation of genetically modified organisms and products made from genetically modified organisms for which the decision issued under this Act;
- 2) controls the authorized organization that meets the requirements for performance testing of genetically modified organisms or products of genetically modified organisms;
- 3) controls the method of testing genetically modified organisms or products of genetically modified organisms in the experimental field, on the farm or in the laboratory by authorized organizations;
- 4) controls the security measures in introducing genetically modified organisms into the environment;
- 5) take samples of genetically modified organisms and products of genetically modified organisms without compensation, to determine compliance with the requirements prescribed by this Law;
- 6) carries out a review of business books and document creators and users in relation to the implementation of regulations on limited use, production or trade of genetically modified organisms and products of genetically modified organisms;
- 7) collecting data and information of those responsible and other persons and questioning witnesses and expert witnesses.

Article 21

In performing inspection supervision over the implementation of this law, the federal inspector is authorized to:

- 1) prohibition of limited use, the introduction of the production or marketing of genetically modified organisms and products made from genetically modified organisms if it is determined that they met the prescribed conditions;
- 2) prohibit the operation of an authorized organization if it finds that does not meet the requirements for performance testing of genetically modified organisms and products of genetically modified organisms, or does not perform the testing and control of genetically modified organisms and products of genetically modified organisms in accordance with the methods for testing;
- 3) prohibit the introduction of genetically modified organisms, and products made from genetically modified organisms into the environment if it is determined that security measures are implemented;

Four) filed a criminal complaint, economic crimes and requirements for the commencement of court proceedings for violation of provisions of this Act;

5) order the other measures under the authority of this law.

The measures in paragraph 1 of the Federal Inspector shall issue a decision.

Against the decision of a federal inspector can be lodged a complaint to the competent federal authority.

The objection is stated, within 15 days of receipt of the decision and does not stay its execution.

The decision of the competent federal authority issued by the objection in paragraph 3 this article is finally in the administrative proceedings.

Article 22

Federal inspectors have the official ID, an official suit and sign a federal inspector.

Form of official identification, an official appearance suits the character and form specified in paragraph 1 this Article shall be prescribed by the competent federal authority.

V. COSTS

Article 23

Costs of testing genetically modified organisms and products of genetically modified organisms shall be borne by the applicant.

The cost of examination by order of the Federal Inspector shall be borne by the applicant.

To cover the cost of the relevant federal organizations in connection with the issuance of license for limited use, the introduction of the production or marketing of genetically modified organisms and products of genetically modified organisms applicant under Article 4 this law is paid a fee.

Amount of compensation from st. 1st to 3 this article provides the federal government.

VI. PENALTY PROVISIONS

1st Criminal offenses

Article 24

Who begin a limited use, introduced in production or put on the market of genetically modified organisms and products of genetically modified organisms that do not get solution and thus cause harmful effects on human health or the environment shall be punished by imprisonment up to one year.

Genetically modified organisms and products of genetically modified organisms in paragraph 1 this Article shall be confiscated and destroyed at the expense of the person who has committed a criminal offense.

2nd Economic Offences

Article 25

A fine of 200,000 to 2 million dinars for an economic offense company or legal entity if it begins limited use, introduced in production or put on the market of genetically modified organisms and products of genetically modified organisms which have not got a solution (Articles 4, 9 , 10 and 12).

For the acts referred to in paragraph 1 this Article shall be punished by an economic offense, the responsible person of the legal person shall be fined 20,000 to 150,000 dinars, and revoking licenses of genetically modified organisms with at least one year.

Text before editing

3rd Violations

Article 26

A fine of 100,000 to 1,000,000 dinars shall be imposed on a company or another legal person if the request of the competent federal organizations do not provide the proper amount of material for testing genetically modified organisms or products of genetically modified organisms (Article 7).

The action specified in paragraph 1 this Article shall be imposed upon the responsible person of the legal person a fine of 10,000 to 50,000 dinars.

Text before editing

Article 27

A fine of 1,000 to 50,000 dinars shall be imposed for acts of art. 25th and 26 this Law or an individual entrepreneur.

Text before editing

VII. TRANSITIONAL AND FINAL PROVISION

Article 28

Regulations for the execution of this law shall be enacted within six months from the date of enactment of this law.

Article 29

This Law shall enter into force eight days after publication in the Official Gazette of the FRY. "
